THE Grate ESCAPE.

EGRESS SAFETY IS EASY

Inventor Steve Jalbert Says:

Safety is a priority when escaping in the case of fire. With a gentle push, children and the elderly are able to exit quickly and **safely**. The **"Grate Escape"** is the superb instrument for easy exit from egress windows that have steel grates installed.

The **"Grate Escape"** is the tool that completes the egress grate.

The **"Grate Escape"** has answered the consumers most frequent asked question:
How can our family members easily get out if we are not there to hold the grate?

The consumer can now be offered the lifts and grates in one.

*This little girl is only six years old.
With a gentle push, she is out of the egress well.*

DESCRIPTION:

Your **"Grate Escape"** is a strong device made out of steel. A three part tool, it comes powder coated and has a great look once installed.

The **"Grate Escape"** comes with a standard gas filled lift that fits between the grate and the egress well.

connects the grate

connects to egress well
